Dear Esther Barajas-Ochoa,

This is in response for The Office of Environmental Health Hazard Assessment (OEHHA) has proposed a No Significant Risk Level (NSRL) for the chemical glyphosate to be adopted into regulation in Title 27, California Code of Regulations, section 25705.

The **human** right to **water** and sanitation. On 28 July 2010, through Resolution 64/292, the United Nations General Assembly explicitly recognized the **human** right to **water** and sanitation and acknowledged that **clean drinking water** and sanitation are essential to the realization of all **human rights**.

From the [Clean Water Act](#) to the [Resource Conservation and Recovery Act](#) to the [Safe Drinking Water Act](#)—stands for the proposition that providing safe, clean water is an absolute government obligation.

Public outrage at the recent wave of drinking water crises also supports the idea that the American public views access to clean water as a basic human right.

It's time for the state and federal governments to accept the idea that responsibility for some human rights falls to them.

We don't want to have glyphosate or fluoride in public water.

Thank you,
Valentina Gavrilenko
